PROJECT

User Registration Web Application — *Link*

- Developed a full-stack web application using Express.js and MongoDB to handle user product registration, ensuring secure and efficient data storage.
- Configured and managed MongoDB database connections and performed CRUD operations, ensuring seamless data retrieval and storage.
- Designed and integrated user-friendly product registration forms using EJS templates and Bootstrap for responsive design.

Blog Web Application — *Link*

- Designed and implemented a complete blog application using Node.js, Express.js, MongoDB and EJS enabling users to create, read, update, and delete blog posts.
- Integrated secure user authentication and authorization mechanisms using cookies to manage user sessions and protect access to sensitive operations.
- Developed and implemented middleware functions to check for authentication cookies, ensuring secure access to protected routes and enhancing application security.
